

We have a new secure electronic money transfer service

Step 1

The sender must sign up at secure-payment-services.com.au

They will need to provide a home address.

Once the account is created they will get a confirmation email and a security code will be sent to their home address.

Step 2

The sender must use the security code to login to their secure-payment-services.com.au account.

Then they can use their credit or debit card to transfer money.

Step 3

Money will be electronically sent to the correctional centre the next business day. It will be allocated to your account by the centre's Trust Accounts team.

When **'transferred to the prison'** appears on the sender's account, the payment has been received by the correctional centre.

* These costs are determined by secure-payment-services.com.au and may be subject to change.
The sender should check the website for current prices.
